

WHAT IS CLAIMED IS:

1. An asthma drug inhaler with a whistle,
comprising: a whistle attached to a small opening for air
5 intake provided at a part of a mouthpiece located on an
inhalation passage of a finely powdered drug,
wherein the whistle makes a sound when the inhalation
is properly done.

10 2. An asthma drug inhaler with a whistle,
comprising: a whistle attached to an air intake provided on
an upper stream of a passage of air for winding up a finely
powdered drug,
15 wherein the whistle makes a sound when the inhalation
is properly done.
